Frontend Developer

Frontend Developer with 7+ years of combined experience in graphic design, video editing, and software engineering across tech and creative industries. I bring a rare blend of design intuition and coding expertise, building sleek, responsive web apps using React, Next.js, and Tailwind. My superpower is transforming complex ideas into stunning, user-friendly interfaces that feel as good as they look.

Technical Skills

Proficient in JavaScript, TypeScript, React, Next.js, Node.js, and Express.js. Experienced with databases like MongoDB, Firebase, Appwrite, Sanity, Sentry, and SQL. Skilled in HTML5, CSS3, Tailwind CSS, Styled Components, and building RESTful APIs with JWT authentication. Familiar with version control using Git and GitHub, deployment through Vercel and Netlify, and API testing with Postman. Strong understanding of Figma, VS Code, debugging, problem solving, and full-stack application development.

Software Engineer Technical Projects

Drivio (Google Drive Clone)   Team Project | 2025

Skills: Next.js, Tailwind CSS, TypeScript, Appwrite, Vercel, GitHub and OTP.
- Built a fully responsive developer portfolio using Next.js, Tailwind CSS, and Framer Motion to showcase projects, skills, and experience.
- Implemented dynamic routing and reusable components for clean structure and easy content management.
- Added dark/light mode and theme switching (red, green, blue) for personalised user experience.
- Integrated a project section with "Show More" functionality and detailed project pages with demo videos and tech stack icons.
- Deployed on custom domain with optimized performance and SEO settings for visibility and speed.

News Explorer Web App   TripleTen Project | 2025

Skills: React.js, JavaScript, API, HTML, CSS, Figma and GitHub.
- Created a real-time file-sharing platform for a global video editor team with secure **OTP-based authentication**
- Implemented authentication with secure login/registration and token-based user sessions.
- Designed interactive UI with dynamic loading states, error handling, and accessible features across devices.
- Enabled users to save and delete articles, storing data securely via REST API and MongoDB backend.
- Improved engagement by building mobile-first layouts and optimizing UX through user testing and iteration.

Eco Challenge Web App   TripleTen Code Jam Project | 2025

Skills: Node.js, Express, MongoDB, Postman, HTML, CSS, Github, Figma, API and Vercel.
- Led a team of four as Team Lead to develop an eco-friendly challenge tracker using HTML, CSS, JavaScript, and Figma, promoting sustainable daily actions.
- Implemented drag-and-drop file upload, rename, delete, and user-to-user file sharing
- Organized files into smart categories (Media, Docs, Images, Other) with search and sort by type
- Built a dashboard with recent activity, shared files, and a storage usage chart
- Ensured full mobile responsiveness, real-world usability, and multi-device testing for global access

Professional Experience

Full Stack Developer, Drivio (Google Drive Clone), International   Apr 2025 - Apr 2025
Freelance Team Project
- Built a fully responsive file-sharing platform using Next.js, Tailwind CSS, and Appwrite to support a global team of video editors
- Implemented OTP-based login, signup, and secure file access using Appwrite's auth system
- Enabled users to drag and drop upload, rename, delete, and share files with teammates
- Organized files into smart categories: Media, Documents, Images, and Other, each with custom search and sort functionality
- Designed a personalized dashboard showing recent uploads, received files, and a storage usage chart

Full Stack Developer, EcoChallenge Web App (Team Project), Los Angeles, CA   Mar 2025 - Mar 2025
Team Project
- Led a 4-member team to design and build an eco-friendly challenge tracker using Vanilla JS, Node.js, and MongoDB
- Created interactive challenge cards with progress tracking and user badges
- Designed Figma UI and built responsive layouts with CSS Grid & Flexbox
- Built backend API for challenge management and user data storage
- Implemented Git workflow, managed merge conflicts, and deployed full app

Frontend Developer, Nexus Portfolio (Personal Project), Los Angeles, CA   Feb 2025 - Mar 2025
Personal Project
- Developed a fully responsive developer portfolio using Next.js, TypeScript, Tailwind CSS, and Framer Motion
- Implemented dynamic routing with project detail pages and smooth animations
- Designed a clean, modern UI to highlight key sections like projects, testimonials, and contact
- Optimized for SEO with meta tags and clean URLs
- Deployed via Vercel with a custom domain

Education
